Hailed by critics and writers as powerful, important fiction, Monkey Bridge charts the unmapped territory of the Vietnamese American experience in the aftermath of war. Like navigating a monkey bridge—a bridge, built of spindly bamboo, used by peasants for centuries—the narrative traverses perilously between worlds past and present, East and West, in telling two interlocking stories: one, the Vietnamese version of the classic immigrant experience in America, told by a young girl; and the second, a dark tale of betrayal, political intrigue, family secrets, and revenge—her mother's tale. The haunting and beautiful terrain of Monkey Bridge is the "luminous motion," as it is called in Vietnamese myth and legend, between generations, encompassing Vietnamese lore, history, and dreams of the past as well as of the future. "With incredible lightness, balance and elegance," writes Isabel Allende, "Lan Cao crosses over an abyss of pain, loss, separation and exile, connecting on one level the opposite realities of Vietnam and North America, and on a deeper level the realities of the material world and the world of the spirits." • Quality Paperback Book Club Selection and New Voices Award nominee • A Kiriya Pacific Rim Award Book Prize nominee

Reading this book will make you less sure of yourself—and that's a good thing. In *The Invisible Gorilla*, Christopher Chabris and Daniel Simons, creators of one of psychology's most famous experiments, use remarkable stories and counterintuitive scientific findings to demonstrate an important truth: Our minds don't work the way we think they do. We think we see ourselves and the world as they really are, but we're actually missing a whole lot. Chabris and Simons combine the work of other researchers with their own findings on

attention, perception, memory, and reasoning to reveal how faulty intuitions often get us into trouble. In the process, they explain:

- Why a company would spend billions to launch a product that its own analysts know will fail
- How a police officer could run right past a brutal assault without seeing it
- Why award-winning movies are full of editing mistakes
- What criminals have in common with chess masters
- Why measles and other childhood diseases are making a comeback
- Why money managers could learn a lot from weather forecasters

Again and again, we think we experience and understand the world as it is, but our thoughts are beset by everyday illusions. We write traffic laws and build criminal cases on the assumption that people will notice when something unusual happens right in front of them. We're sure we know where we were on 9/11, falsely believing that vivid memories are seared into our minds with perfect fidelity. And as a society, we spend billions on devices to train our brains because we're continually tempted by the lure of quick fixes and effortless self-improvement. The Invisible Gorilla reveals the myriad ways that our intuitions can deceive us, but it's much more than a catalog of human failings. Chabris and Simons explain why we succumb to these everyday illusions and what we can do to inoculate ourselves against their effects. Ultimately, the book provides a kind of x-ray vision into our own minds, making it possible to pierce the veil of illusions that clouds our thoughts and to think clearly for perhaps the first time.

The astonishing, uplifting story of a real-life Indiana Jones and his humanitarian campaign to use education to combat terrorism in the Taliban's backyard Anyone who despairs of the individual's power to change lives has to read the story of Greg Mortenson, a homeless mountaineer who, following a 1993 climb of Pakistan's treacherous K2, was inspired by a chance encounter with impoverished mountain villagers and promised to build them a school. Over the next decade he built fifty-five schools—especially for girls—that offer a balanced education in one of the most isolated and dangerous regions on earth. As it chronicles Mortenson's quest, which has brought him into conflict with both enraged Islamists and uncomprehending Americans, Three Cups of Tea combines adventure with a celebration of the humanitarian spirit.
