Records: A Practical...

EHRs are real-time, patient-centered records that make information available instantly and securely to authorized users. While an EHR does contain the medical and treatment histories of patients, an EHR system is built to go beyond standard clinical data collected in a provider's office and can be inclusive of a broader view of a patient's care.

How long do doctor visits last?

Electronic health records ...

An electronic health record (EHR) is software that's used to securely document, store, retrieve, share, and analyze information about individual patient care. EHRs are hosted on computers either locally (in the practice office) or remotely. Remote EHR systems are described as "cloud-based" or "internet-based."
