Introduction to Management Information Systems - IITAE Ltd
Information management concerns a cycle of organizational activity: the acquisition of information from one or more sources, the custodianship and the distribution of that information to those who need it, and its ultimate disposition through archiving or deletion. This cycle of information organisation involves a variety of stakeholders, including those who are responsible for assuring the quality, accessibility and utility of acquired information; those who are responsible for its safe storage

Information management - Wikipedia
This book provides a clear and concise overview of Information Management covering the key aspects of infrastructure, design, information assets and managing information. * Part 1 explores the diversity and changing nature of managing the information management function. * Part 2 investigates the role of information as an organizational resource.

Introduction to business and management
A management information system (MIS) can be defined as a system that: Provides information to support managerial functions like planning, organizing, directing, controlling. Collects information in a systematic and a routine manner which is in accordance with a well defined set of rules. Includes files, hardware, software and operations research models of processing, storing, retrieving and transmitting information to the users.

Introduction to Management Information Systems (MIS) - MBA ...
Information management is a corporate responsibility that needs to be addressed and followed from the uppermost senior levels of management to the front line worker. Organizations must be held and must hold their employees accountable to capture, manage, store, share, preserve, and deliver information appropriately and responsibly.

What is Information Management?
Effective information management enables project teams to use their time, resources and expertise effectively to make decisions and to fulfil their roles. The process of information management encompasses: Collection of project information can take many forms, such as written, video, oral, audio or electronic. It is important to collect only as much information as reasonably needed and assure its quality, i.e. that it can be trusted (SOIPM3).
