This volume responds to a renewed focus on tragedy in theatre and literary studies to explore conceptions of tragedy in the dramatic work of seventeen canonical American playwrights. For students of American literature and theatre studies, the assembled essays offer a clear framework for exploring the work of many of the most studied and performed playwrights of the modern era. Following a contextual introduction that offers a survey of conceptions of tragedy, scholars examine the dramatic work of major playwrights in chronological succession, beginning with Eugene O'Neill and ending with Suzan-Lori Parks. A final chapter provides a study of American drama since 1990 and its ongoing engagement with concepts of tragedy. The chapters explore whether there is a distinctively American vision of tragedy developed in the major works of canonical American dramatists and how this may be seen to evolve over the course of the twentieth century through to the present day. Among the playwrights whose work is examined are: Susan Glaspell, Langston Hughes, Tennessee Williams,

Arthur Miller, Edward Albee, Lorraine Hansberry, Amiri Baraka, August Wilson, Marsha Norman and Tony Kushner. With each chapter being short enough to be assigned for weekly classes in survey courses, the volume will help to facilitate critical engagement with the dramatic work and offer readers the tools to further their independent study of this enduring theme of dramatic literature.

This widely adopted text explores key theories and models that frame reading instruction and research. Readers learn why theory matters in designing and implementing high-quality instruction and research; how to critically evaluate the assumptions and beliefs that guide their own work; and what can be gained by looking at reading through multiple theoretical lenses. For each theoretical model, classroom applications are brought to life with engaging vignettes and teacher reflections. Research applications are discussed and illustrated with descriptions of exemplary studies. New to This Edition *Current developments in theory, research, and instructional practices. *Useful pedagogical features in every chapter: framing questions, discussion ideas, and learning activities. *Classroom applications give increased attention to English language learners and technology integration. *Coverage of additional theories (Third Space Theory) and theorists (Bakhtin and Bourdieu).

basic issues in defining and understanding the word as a unit of language. It also examines the history of lexicology, the evolution of dictionaries and developments in the field. It is of interest to undergraduate students of linguistics.

A dramatic, thought-provoking portrait of one of the most compelling figures in early Christianity which explores two thousand years of history, art, and literature to provide a close-up look at Mary Magdalen and her significance in religious and cultural thought.

Superb step-by-step guide enables even beginners to create beautiful lace according to age-old technique. Edgings, doilies, squares, petals, picots, more. Projects graded, simple to advanced. 249 illustrations. Bibliography.

Perspectives in Lexicology and Corpus Linguistics offers an introduction to words and corpus linguistics. From this foundation it explores the much wider issues that are inevitably raised but somehow marginalized in lexicology (the study of words) and corpus linguistics: how are individual words integrated into language? What are the real benefits of studying the large quantities of text now available in corpora? How do we best conceptualize meaning itself?>
