The backbone of Dutch immigration law is in Acts of Parliament: the Immigration Act 2000 (Vreemdelingenwet); the Work by foreigners Act 1995 (Wet arbeid vreemdelingen); and the Nationality Act 2003 (Rijkswet op het Nederlanderschap). These acts provide decision-making power to the State Secretary of Justice and Security regarding immigration (Immigration Act) and naturalisation (Nationality Act) and to the Minister of Social Affairs and Employment regarding work permits and sanctions for ...

The Law on integration obliges most immigrants who are not citizens of the EU, Switzerland, Turkey, or the European Economic Area countries to learn Dutch and pass an exam within a few years of their arrival in the Netherlands. Since first appearing in draft form as part of a proposal in the House of Representatives, the exam has proven to be highly controversial. It continues to be both a subject of controversy, and even ridicule, in the Netherlands. According to a separate law, known in Dutch

Netherlands Immigration Laws and Regulations Handbook - Strategic Information and Basic Laws  
Until recently, migration policies primarily targeted labour migrants and asylum seekers. Family migration was taken for granted. But now, many nations are restricting family migration, particularly from poorer countries. The Netherlands have even gone so far as to require family migrants to pass an integration test before being allowed to enter the country. How can this shift in policies be explained? Does it, as some suggest, indicate a new trend towards racist exclusion? This book places family migration policies in the broader perspective of changing family norms. In doing so, it shows the added value of studying immigration law not as an isolated field, but in connection with other fields of law and policy. Taking the Netherlands as an example, it shows how family migration policies have evolved from a system premised on the male breadwinner-citizen's right to domicile, to one granting and restricting freedom of movement according to individual merit. Although grounded in a different ethos, the techniques of power now being used to enforce the emerging distinctions of a globalising world are in fact reminiscent of those once used to enforce the racial and gendered distinctions of the colonial past.

In June 2013, new immigration policies will take effect in the Netherlands through the adoption of two new laws, the Modern Migration Policy Act and the National Visa Act. One key feature of the Modern Migration Policy Act, which amends the Aliens Act 2000, is a new emphasis on sponsorship. Another significant feature is the streamlining of the resident permit application process by combining into one procedure the application processes for the provisional ninety-day residence permit and the long-term residence permit. The Act also strengthens enforcement provisions of the Aliens Act 2000. Some other notable changes in Dutch immigration policy, on the issues of family reunification, criminalization of illegal residence, and strengthening of public order and national security measures vis-à-vis foreign residents, were made in 2012.

Service Provision and Migration provides a thorough overview of EU and WTO service trade liberalization related to movement of natural persons (GATS Mode 4) and the implementation of the resulting obligations within Dutch and UK immigration law.

A recent development in the immigration policies of several European states is to make the admission of foreign nationals dependent upon criteria relating to their integration. As the practice of 'integration testing abroad' becomes more widespread, this book endeavours to clarify the legal implications which have hitherto remained poorly understood and studied. The book begins by looking at the situation in the Netherlands, which was the first EU Member State to introduce pre-entry integration requirements. It explores the historical and political origins of the Dutch Act on Integration Abroad and explains how, in this national context, integration has become a criterion for the selection of immigrants. It then examines how integration requirements must be evaluated from the point of view of European and international law, including human rights treaties, EU migration directives and association agreements and the law on non-discrimination. The book identifies the legal standards set by these instruments with regard to integration testing abroad and draws conclusions as to the lawfulness of the Dutch approach.

LeMay offers a long-term historical analysis of American immigration policy and details current policy and its shortcomings. Written in a clear and readable style, the book combines a historical approach with an assessment of a timely and topical area in public policy.

The dynamics of migration in Europe have changed dramatically over the last few decades. Some countries, such as Ireland, Italy and Spain, are newcomers to an increasingly diverse Europe, having moved from being sources of emigration to destinations for migrants. Others such as France, Germany and the UK have many more years of experience with immigrants. Some of the biggest challenges facing Europe in the context of migration relate to irregular migration and integration by immigrants and refugees. What are the immigration needs of the different European countries? What are their labour needs? Can Europe's existing population satisfy those labour needs? How can European countries work together to protect and improve the current refugee and asylum system? In the light of these pressing issues, it is vital that academics and NGOs work together to promote debate, research and the publication of reliable information about migration and refugees. To this end, academics, policy-makers and representatives of NGOs met at the University of Deusto in Bilbao, Spain (30 January-1 February 2003) to reflect on and debate the state of immigration in Europe. The results are published in this book.

This book, first published in 1985, presents a comprehensive analysis of immigration policy in Europe. Six representative countries are looked at in detail: Sweden, Holland, Britain, France, West Germany and Switzerland. All have experienced large-scale post-war immigration and exemplify different policy responses: the 'guestworker' system in Germany and Switzerland; policies aiming at permanent settlement in Britain and Sweden; intermediate policies in France and Holland. Britain, France and Holland are also countries where there has been substantial immigration from ex-colonies. The book looks at the size and composition of immigration to each country, its history, the economic and social background to immigration, its regulation and policy measures and their effects on immigrants. The second part of the book provides a comparative analysis of the different immigration policies and the reasons for them; changes in immigration policy; the different forms of regulation and control, housing, education, and social welfare provisions.
