The essential guide to energy independence – fully revised and updated

Traditionally, university students have gained access to world religions by reading primary texts. Discovering World Religions at 24 Frames Per Second takes students beyond the written page, offering an exploration of the same religious traditions through the study of feature films. The many definitions of religion are examined along with its various components, including doctrine, myth, ethics, ritual, and symbol. Specific religious traditions, including Hinduism, Sikhism, Zoroastrianism, Buddhism, Confucianism, Daoism, popular religion, and Shinto are examined. Biographical sketches of directors whose films tend to focus on a particular religious tradition are also included, such as Zhang Yimou, Hayao Miyazaki, Deepa Mehta, and Akira Kurosawa. Discovering World Religions at 24 Frames Per Second is unique in the area of religion and film studies in that it isn't just a collection of essays. Instead it provides the introductory student with the necessary background information on the various religions before looking at how their ideas can be understood not through texts but through the cinematic medium. To keep the conversation fresh, most of the films used in the book were made within the last decade. Furthermore, examples range from popular, mainstream fare, such as Star Wars and the Lord of the Rings trilogy to lesser-known foreign films, such as The Wooden Man's Bride and The Great Yokai War. Several films with a 'cult-like' following are also discussed, including Fight Club, Princess Mononoke, Spirited Away, and Jacob's Ladder. This book is also unique in that instead of drawing upon the Judeo-Christian tradition, it draws from Eastern traditions.

The Constable was content to call it a suicide pact. All the evidence was there. The bodies of John Barratt and Mrs Callis were discovered in a lovers' nook among some bracken. Beside them was a pistol with Barratt's fingerprints on it, and torn up letters in the handwriting of Barratt and Mrs Callis were scattered around. Arrangements for the elopement had apparently been complete. Why had their plans fallen through? Why had they turned their backs on the railway station with tickets to London in their pockets? Sir Clinton Driffield is not so sure that the obvious solution is the right one ...

Trapped in an affair with a blackmailer... After Ashley Rivers is involved in a hit and run accident, she picks up the pieces of her life and tries to move on, but the tragedy ruins her friendship with the two people most important to her. To fill the void, she falls into a psychologically abusive relationship with a sociopath. Estranged from the man she has always loved... Giving up her place in the North Arkansas Paranormal Society isn't easy for Ashley. She longs to go back to the old ghost hunting days with her partners, Josh and Gray, but the hurt Josh inflicted on her is hard to forget. Distancing herself from him is even harder. Entangled in a dark web of murder and revenge... When a mysterious death on Ashley Ridge stirs up old haunting rumors, Lead Crime Scene Investigator with the Hill County Sheriff's Office, Josh McCord, pulls Ashley into the investigation. Investigating the haunting draws Josh and Ashley together, but Josh fears Ashley will crush his heart again. Can two wounded hearts repair the damage done by the past and find love on Ashley Ridge?

The Latin language has been the one constant in the cultural history of the West for more than two millennia. It has been the foundation of our education, and has defined the way in which we express our thoughts, our faith, and our knowledge of how the world functions. Indeed, the language has proved far more enduring than its empire in Rome, its use echoing on in the law codes of half the world, in the terminologies of modern science, and until forty years ago, in the liturgy of the Catholic Church. It is the unseen substance that makes us members of the Western world. In his erudite and entertaining "biography," Nicholas Ostler shows how and why (against the odds, through conquest from within and without) Latin survived and thrived even as its creators and other languages failed. Originally the dialect of Rome and its surrounds, Latin supplanted its neighbors to become, by conquest and settlement, the language of all Italy, and then of Western Europe and North Africa. Its cultural creep toward Greek in the East led it to copy and then ally with it in an unprecedented, but invincible combination: Greek theory and Roman practice, delivered through Latin, became the foundation of Western civilization. Christianity, a latecomer, then joined the alliance, and became vital to Latin's survival when the empire collapsed. Spoken Latin re-emerged as a host of new languages, from Portuguese and Spanish in the west to Romanian in the east. But a knowledge of Latin lived on as the common code of European thought, and inspired the founders of Europe's New World in the Americas. E pluribus unum. Illuminating the extravaganza of its past, Nicholas Ostler makes clear that, in a thousand echoes, Latin lives on, ad infinitum.

"Having faith in the Lord is not something that involves solely our intelligence, the area of intellectual knowledge; rather, it is a change that involves our life, our whole self: feelings, heart, intelligence, will, corporeity, emotions, and human relationships. With faith everything truly changes." So Pope Benedict XVI introduced his catecheses for the Year of Faith, a series of sixteen talks given at his weekly audience from October 2012 to the end of his papacy in February 2013. These talks explore how and why faith is relevant in the contemporary world. How can we come to certainty about things that cannot be calculated or scientifically confirmed? What does God's revelation mean for our daily lives? How can the hunger of the human heart be fulfilled? Offering the guidance of biblical exegesis, pastoral exhortation, and brotherly encouragement, Pope Benedict seeks to answer these questions and many others.

Finance is a topic that requires much computation, and in todayâ€(tm)s business world that computation is almost entirely done using Microsoft Excel. Despite this, existing finance textbooks continue to rely heavily on hand calculators, and business school students find that when they leave the academic environment they have to relearn finance using Excel. Addressing this issue, Principles of Finance with Excel is the only introductory finance text that comprehensively integrates Excel into the teaching and practice of finance. The second edition covers the same topics as standard financial textbooks, including portfolios, capital asset pricing models, stock and bond valuation, capital structure, and dividend and optional policy, and can therefore be used in any introductory course. However, this text also introduces Excel as it applies to finance students, demonstrating and explaining the implementation of finance concepts with Excel, and providing thorough coverage of all Excel topics including graphs, function data tables, dates in Excel, Goal Seek, and Solver. Combining classroom-tested pedagogy with the powerful functions of Excel, Simon Benninga, one of the most recognised names in financial modelling, shows students how spreadsheets can provide new and deeper insights into financial decision making.

Perfect for students of costume design and history, A Handbook of Costume Drawing illustrates and describes the dominant male and female costume silhouettes for major historical periods ranging from Egyptian dynasties through the 1960s. Important details, including head and footwear, hair styles, fashion accessories, shoulders, waist, hem, and neckline are provided to maximize the historical accuracy of each design and to help you fully recreate the look and feel of each period.
