Since they were issued in 1999, the OECD Principles of Corporate Governance have gained worldwide recognition as an international benchmark for good corporate governance.

This guidebook offers training modules for the promotion of public-private partnerships in the delivery of public services. PPPs in theory are supposed to combine the best of both worlds. The private sector with its resources, management skills and technology; and the public sector with its regulatory actions and protection of the public interest provide a balance in delivering public service. PPPs though are also complex in nature, requiring different types of skills and new enabling institutions and they lead to changes in the status of public sector jobs. To work well, they require "good governance", that is, well-functioning institutions, transparent, efficient procedures and accountable and competent public and private sectors. This guidebook therefore seeks to elaborate best practice and is aimed at policymakers, government officials and the private sector.

There is growing recognition of the need for new approaches to the ways in which donors support accountability, but no broad agreement on what changed practice looks like. This publication aims to provide more clarity on the emerging practice.

Since they were issued in 1999, the OECD Principles of Corporate Governance have gained worldwide recognition as an international benchmark for good corporate governance. This revised version takes into account developments since 1999 and includes several important amendments.
